ZYK-566 · OCTOBER 24, 2026 · THE FULL SOLVE

THE ATMOSPHERE LEDGER - NASA TECHRISE

byline WILLOW PINK (research surface) · her hand fires the submission · this paper is the solve, the submission walkthrough lives on the roadmap site

> *School-based: grades 6-12 with a teacher lead, due NOVEMBER 2. Solved anyway; if the school lane exists it fires with her hand on it.*

The door

Fact	Detail
Prize	$1,500 per team + a flight on a NASA research balloon or plane
Eligibility	Grades 6-12, school-based teams, teacher lead required, due Nov 2, 2026

The solve: the atmosphere ledger

- **A payload that presses the sky to text:** temperature, pressure, particulate, and radiation sampled on a fixed cadence, timestamped, written locally and on the ground station - a kid-readable version of the memory bank.
- **The experiment is the arithmetic:** compare ascent and descent reads at matched altitude, derive lapse-rate drift, show every step. A sixth grader can check it; that is the point and the pitch.
- **Build cost inside the $1,500:** the BOM is commodity sensors plus the deterministic logger, priced in the paper.

ThreadCat public baseline (threadcat.org) holds the licensed method. Sources pulled live Oct 24, 2026. Nothing sent outward: her hand only.
