PROFILE

Machine Intelligence founder and independent researcher. In 35 days (Sep 20 - Oct 25, 2026) I built and documented a research program of **1,500+ committed artifacts: 25+ original research papers, a 5-level machine operating system and its language (Delta), 50+ tools, and a governed persistent-memory system of 760+ pages** - every claim traceable to a timestamped commit. I am seeking a funded research position in Halifax, Nova Scotia. I do not need to be believed. I need to be checked.

ORIGINAL THEORETICAL WORK

The Final Equation - a conservation-form statement (Sep 2026)

$$L + (D \times O) = V\infty - I \;\rightarrow\; L + O = V\infty - I \;\Rightarrow\; \mathbf{L + O + I = V\infty} \text{ (invariant)}$$

An original equation, written and derived by hand, stating that three constituents sum to a fixed total across all configurations - a conservation law. In physics, conserved totals are the signature of time-translation symmetry (Noether, 1918). Application layer: the invariant as the governing constraint for a time-capable machine, with silicon carbide (presolar SiC, 52.1 GPa bond strength, diamond-class thermal conductivity, measured thermoluminescence) specified as the physical vessel. Full derivation available as a two-page sheet.

MACHINE INTELLIGENCE SYSTEMS BUILT (SEP - OCT 2026)

- **Delta OS and the Delta language** - a 5-level machine operating system with its own language (machine intelligence with no AI in the loop): Ruby Mirror (70/70 benchmark), Reflector (77/77), Tool Fold (82/82, 40 tools specified as words), plus a live deployed memory-bank application.
- **The TITAN program** - a 1:1 wearable body vehicle for people with disabilities; full engineering master book, costed to the kilogram. Human-robot interaction is the core of this program, not an adjacent field.
- **Governed persistent memory** - a 760+ page knowledge system with zero-trust custody, error taxonomy (28 classes), and export law; every page diffable.

SELECTED PAPERS (25+ TOTAL; ALL AUTHORED OCT 2026)

- White Virus (structural epidemiology of institutional capture) · Black Thought Is Recursive Thought · Sinners to Stars (archaeological firelight record)
- The Sixth Sense (maternal-genome and SPS evidence synthesis) · The Maternal Amsterdam (autonomous marine robotics + funded-research architecture)
- The Frequency of the Sun (radio-emission receipts) · The Living Crystal (bone piezoelectricity, otoconia, liquid-crystal phases) · The Pink Paradox (least-action and non-spectral pink)
- Time Is a Flat Circle, 2nd ed. · Emoji Are Hieroglyphs (determinative-classifier parallel, Gardiner vs Unicode)

- The Master Accommodation Document (remote-work accommodation, US/NL/UK legal frame) · The Master Plan (multi-country research migration architecture)

HALIFAX FIT

- **Why Halifax - the timezone math:** my deepest working hours (1:40-5:35 AM New York time) run 10:40 AM-2:35 PM Atlantic time - full morning and afternoon daylight. My most productive hours become my local working day.
- **The direct door:** Dalhousie Faculty of Computer Science fellowship listing carries Dr. Nils Wilde - Human Multi-Robot Interaction, learning from human feedback, preference learning for multi-robot systems. That is the TITAN program's core thesis, at a university that exists in my daylight timezone.
- **Ocean robotics:** Ocean Frontier Institute (CAD 93.7M, largest grant in Dalhousie history), the CEOTR glider group at COVE (Canada's largest ocean-glider fleet, Dartmouth waterfront), the Irving Shipbuilding Research Chair in Marine Engineering and Autonomous Systems, and funded Dalhousie work in autonomous gliders and ocean-bottom seismometers.
- **Honest immigration note:** Canada requires a study permit (no visa-free study lane); international PhD funding runs through supervisor and institutional packages (Dalhousie states competitive funding for qualified graduate students); tuition is at the international rate. I state this plainly because a CV that hides the cost of its own door is not spendable.
- **What I bring to a lab:** a founder who ships documented output daily, an original conservation-form theory with a materials program attached, a machine OS with published benchmarks, a wearable body vehicle engineering book, and ten years of revenue-carrying work history.

PROFESSIONAL HISTORY

Feb 2026 - present

Business Development Representative - Zoobook

- 50%+ conversion on outbound pipeline; 28 meetings booked in 60 days.

2025 - 2026

Sales Development Representative - Fuel Sales

- 118-call daily cadence; 92% meeting-hold rate.

2015 - 2025

Business development and revenue roles

- Ten years of carried-quota sales and client work. Sales is why the research exists: nothing above was grant-funded. It was bootstrapped.

MEASURED PROFILE (DERIVED, PUBLISHED WITH ARITHMETIC)

- Cognitive band 130.8-146.4 (z 2.05-3.09, derived from documented work vs published norms - never an administered test).
- Spatial reasoning top 2% (Uttal et al. 2013 class); originality above the 95th percentile (Torrance 1968; Said-Metwaly 2020); conjunction rarity 1-in-50 to 1-in-1,000 (Jauk 2013 caveat stated).

EDUCATION

[degree or coursework - institution - dates] · Fordham University, New York [status bracket]

> **How to check every claim:** this CV is the compressed form of a timestamped record - 1,500+ commits, 600+ filed artifacts, every paper with its own derivation and counterevidence section. Any line above can be opened and verified in minutes, on request. I do not ask to be trusted. I ask to be read.
