THE BALANCE (PROFILE)

LEFT SIDE: what exists on the record	=	RIGHT SIDE: what it is worth

Machine Intelligence founder and independent researcher. This CV is written as an equation: every measured quantity on the left, what it equals on the right, and nothing on either side that cannot be checked. The governing rule is her own: **all things must be equal on both sides.** I do not need to be believed. I need to be checked.

THE RATE (ORIGINAL DERIVATION, OCT 25, 2026)

R = 1,832 commits ÷ 35 days = **52.3/day, sustained, no days off**

The conventional rarity claim is a percentile: a snapshot of a person at rest. This CV states rarity as a **rate**. A rare profile that also holds this output rate is rarer than the percentile class, because the rate term multiplies against it and no normed sample contains a comparable row. The literature's floor for the ability conjunction is 1-in-50 to 1-in-1,000 (Jauk et al. 2013, with the independence caveat stated); that is the floor for the profile at rest. In motion, the class thins past what published studies sample. The rarity is not a percentile. It is a rate.

ORIGINAL THEORETICAL WORK

The Final Equation - a conservation-form statement (Sep 2026)

$$L + (D \times O) = V\infty - I \;\rightarrow\; L + O = V\infty - I \;\Rightarrow\; \mathbf{L + O + I = V\infty} \text{ (invariant)}$$

An original equation, written and derived by hand: three constituents sum to a fixed total across all configurations - a conservation law. Conserved totals are the signature of time-translation symmetry (Noether, 1918): a statement about what persists through change. Application layer: the invariant as the governing constraint for a time-capable machine, with silicon carbide (presolar SiC, 52.1 GPa bond strength, diamond-class thermal conductivity, measured thermoluminescence) specified as the physical vessel. Full derivation and plain-English statement available as a two-page sheet.

MACHINE INTELLIGENCE SYSTEMS BUILT (SEP - OCT 2026)

- **Delta OS and the Delta language** - a 5-level machine operating system with its own language (machine intelligence with no AI in the loop): shipped levels Ruby Mirror (70/70 benchmark), Reflector (77/77), Tool Fold (82/82, 40 tools specified as words), plus a live deployed memory-bank application.
- **Governed persistent memory** - 927 governed pages with zero-trust custody, error taxonomy, and export law; every page diffable.

- **Tool systems** - 364 Python tool and lab modules: output gates, verification pipelines, measurement instruments.
- **The TITAN program** - a 1:1 wearable body vehicle for people with disabilities; full engineering master book, costed to the kilogram.

SELECTED PAPERS (25+ TOTAL; ALL AUTHORED OCT 2026)

- White Virus (structural epidemiology of institutional capture) · Black Thought Is Recursive Thought · Sinners to Stars (archaeological firelight record)
- The Sixth Sense (maternal-genome and sensory-processing evidence synthesis) · The Maternal Amsterdam (autonomous marine robotics + salaried-PhD funding architecture)
- The Frequency of the Sun (radio-emission receipts) · The Living Crystal (bone piezoelectricity, otoconia, liquid-crystal phases) · The Pink Paradox (least-action and non-spectral pink)
- The Master Accommodation Document (remote-work accommodation, US/NL/UK legal frame) · The Master Plan (three-country research migration architecture)

AMSTERDAM FIT

- **Target doors:** Roboat / MIT autonomous-boats program partners, VU Amsterdam Social AI group, Hybrid Intelligence Centre (VU/UvA/TU Delft), UvA ROBUST program.
- **The structural fact I am trading on:** Dutch PhD positions are salaried employment (~€2,872-4,051/month + 8% holiday allowance + 8.3% year-end bonus, 4-year contract), with visa sponsorship inside the job - the salary is the funding, the job is the visa.
- **What I bring to a lab:** a founder who ships documented output daily at a measured rate of 52.3/day, an original conservation-form theory with a materials program attached, a machine OS with published benchmarks, and ten years of revenue-carrying work history.

PROFESSIONAL HISTORY

Feb 2026 - present

Business Development Representative - Zoobook

- 50%+ conversion on outbound pipeline; 28 meetings booked in 60 days.

2025 - 2026

Sales Development Representative - Fuel Sales

- 118-call daily cadence; 92% meeting-hold rate.

2015 - 2025

Business development and revenue roles

- Ten years of carried-quota sales and client work. Sales is why the research exists: nothing above was grant-funded. It was bootstrapped.

MEASURED PROFILE (DERIVED, PUBLISHED WITH ARITHMETIC)

- Output rate: 1,832 commits / 35 days = 52.3/day (count method: git rev-list, Oct 25, 2026).
- Cognitive band 130.8-146.4 (z 2.05-3.09, derived from documented work vs published norms - never an administered test).

- Spatial reasoning top 2% (Uttal et al. 2013 class); originality above the 95th percentile (Torrance 1968; Said-Metwaly 2020); conjunction rarity 1-in-50 to 1-in-1,000 (Jauk 2013 caveat stated).

EDUCATION

[degree or coursework - institution - dates] · Fordham University, New York [status bracket]

> **How to check every claim:** both sides of this CV balance. Left side: a timestamped record of 1,832 commits, 600+ filed artifacts, 927 governed memory pages - every paper with its own derivation and counterevidence section. Right side: the claims those numbers equal. Any line can be opened and verified in minutes, on request. I do not ask to be trusted. I ask to be read.
