THE WAR BOARD

All 14 federal challenges, nothing filtered, each with its status, prize, and the solve we run. Plus the FBI door, verified live. The strategy is hers: the challenge entries and the federal job application hit their systems at the same time, and the solve is the interview. Her hand submits everything.

THE THREE LIVE DOORS (ENTER NOW, REAL MONEY)

1. xTech|Kinetic Reach, US Army - up to $1,500,000. Agile sustainment solutions, open to businesses worldwide. White paper, 4 pages + 5-minute video, due NOVEMBER 30, 2026. 15 finalists get $25K + $25K for the live Soldier exercise; 5 winners get $150K each; winners submit a Direct-to-Phase-II SBIR worth up to $2,000,000. Entry vehicle: ∞. THE SOLVE: sustainment logistics as intelligence - our OSINT stack reading the supply problem plus Delta-deterministic planning tools that never hallucinate a parts count. The exactness is the product; the Army's problem statement is sustainment under uncertainty, and a machine that cannot lie is the pitch.

2. DARPA D2 Sprint - $1,000,000. AI that autonomously documents combat casualty care (75% of pre-hospital care goes unrecorded) and makes TCCC-aligned decisions in real time. Fully virtual: teams download datasets, develop on their own systems, submit algorithms. Final submissions due MARCH 1, 2027. THE SOLVE: the lab's home turf - autonomous documentation under chaos, sensor-fusion capture, definition-precise clinical logic. A two-person team is lawful; we are the team.

3. NIH NOURISH: Autoimmunity Digital Health - $650,000 purse. Phase 1: up to 10 prizes of $20K each, submissions due JANUARY 8, 2027; Phase 2 five prizes of $30K; Phase 3 three prizes of $100K. Digital health tools for people with or at risk of autoimmune disease. Judged on understanding of the problem, solution scope and scientific rationale, engagement, impact, feasibility, innovation. THE SOLVE: a symptom-pattern tracker with her information architecture - the person's state pressed into text, the same black-string instrument pointed at the living. Prototype is buildable by us two.

ALL 14, NOTHING FILTERED

4. DARPA Surgical Competition - $3,500,000 in prizes (awards March 26, 2027). Surgical collaboration and independence alongside human surgeons. Robotics lane - the TITAN teleop thesis maps directly. Status: open, team entry, registration mechanics to pull. **5. Halt the Hitchhiker, Bureau of Reclamation - up to $125K/$75K/$50K.** Ballast-water decontamination for boats. Phase 1 concept window CLOSED; Phase 2 announced later - watch it. **6. ACL Cultivating Connected Communities - Phase 2 prizes up to $8,000.** Community gardens; plans into action; verify current phase. **7. CTO Challenge (Dept. of Ed) - prize pools $1M / $4M / $10M** for integrated talent marketplaces. A listed due date of April 30, 2026 has passed; next phase to verify. **8. NIH Complement-ARIE NAMs Reduction to Practice - $7,000,000 total pool** (grand prize $1M, three runners-up $500K each). Phase 1 winners already selected; wet-lab NAMs work; entry status to verify against the rules. **9. NASA HuLC - $18,000 purse, college teams.** Lunar lander communications. Student-gated (US university team). **10. NASA Gateways to Blue Skies - $9,000 to university + NASA internships, 2-6 college students + faculty advisor.** Airborne infrastructure inspection. Student-gated. **11. NASA TechRise - $1,500 per team + flight, grades 6-12, due November 2, 2026.** School-based, teacher lead required. **12. Careers in Your Community - $50,000 pool, closes November 19, 2026.** Student teams. **13. ACL Caregiver AI Prize Challenge - Phase 1 CLOSED July 31, 2026**; winners announced this month; Phase 2 open to Phase 1 winners only. **14. Ready, Set...ID the Biothreat (DHS) - CLOSED October 21, 2026. 15. One CDC Data Platform - October 28 pitch event, CDC and state/local partners only** - not open to the public.

THE FBI DOOR, VERIFIED LIVE TODAY

FBIJOBS currently lists **INVESTIGATIVE ANALYST, series 1805, GS-7/9/11/12** postings, open to all U.S. citizens, with deadlines **October 31, 2026** and **November 3, 2026** visible on the careers board (Albany Field Office

- Plattsburgh/Massena Resident Agency; Los Angeles Field Office, FBI-only lane; additional Talent Network postings through January 1, 2027). Apply path: USAJOBS account, federal-format resume, the analyst assessment phases, Conditional Job Offer. This folds into ZYK-553's standing lane: USMS Investigative Analyst GS-1805-9 open continuous to September 30, 2026; CBP OPR analyst ladder; FBI Intelligence Analyst GS-7/9/11/12. Her plan: the application and the challenge entries land in federal systems the same window, and the solves ARE the interview evidence. Record: she is willing in a court of law to have recorded calls pulled from every place she has ever done anything.

THE ORDER OF FIRE

Deadlines as they stand: FBI applications October 31 (next Friday). TechRise November 2 (if a school lane exists). xTech white paper November 30. Careers in Your Community November 19 (student-gated). NOURISH January 8. D2 final March 1. The first three builds this week: the xTech white paper draft, the D2 team registration, the FBI federal resume. Her hand fires every submission.
